

# BLACKHAWK ENGINEERING, Ltd.

## Company Profile

BlackHawk Engineering is a consulting firm located in southwest Wisconsin. Our firm works directly with our clients from the project beginning to end. Our project engineers are involved in the whole project. The initial planning of projects, surveying, design, construction inspection, and final punch list are all completed by our project engineers. This is a big asset to our clients by cutting down on the time needed to complete a project.

***Mission Statement*** - At BlackHawk Engineering, our team of highly skilled professionals provides you with complete service in the fields of civil, municipal, environmental, transportation, and structural engineering, as well as building design, land surveying, land development, and grant applications.

***General Information*** - . Our staff has years of expertise and experience in engineering, project management and the construction process. We have handled projects varying from several thousand dollars to several million dollars and have close working relationships with many federal and state agencies that are critical to project completion.

BlackHawk Engineering was formed in 1977. For more than 20 years, our engineering staff has been assisting the communities of Southwestern Wisconsin and beyond with a wide variety of engineering needs. We pride ourselves on our thoroughness and efficiency, and make it our priority to provide you with the results you want.

---

George Morrissey from the City of Shullsburg, Wisconsin says it best "If you want a quality and competent engineering and design firm, whether it is a five hundred dollar or a two million dollar project like this one, BlackHawk Engineering is the firm you can count on!"
