

## Southwest Health Center –

### *General Information –*

Southwest Health Center is a full service emergent and inpatient care facility located in Platteville, Wisconsin. We have been providing quality, compassionate healthcare to our neighbors for over 50 years, and in 2005 we celebrate the opening of our new facility - a state of the art building designed to make everyone's lives healthier and give healers the best equipment and technologies possible.

### *Brief History –*

The first hospital in the Platteville area was built in 1900 and serviced the community for 50 years. Then in 1950, the community came together to build the Platteville Municipal Hospital and Nursing Home. In 1981, the Platteville hospital combined with the hospital in Cuba City to consolidate resources. Then in 1985, all of the nursing home patients were transferred to the Cuba City facilities while all acute care patients were moved to Platteville in an effort to make things more efficient. And most recently, the brand new Southwest Health Center building was opened on March 12, 2005.

### *Services Offered –*

A wide variety of hospital services are provided including Surgical Services, Emergency and Urgent Care Services, Social Services, Medical Services, Nutrition Counseling, Laboratory Services, Radiology Services, Respiratory Services, Community Health, Outpatient Care, Rehabilitation, Senior Services and Specialty Services. Southwest Health Center is also entering into a joint venture with ElderSpan Management, LLC, a Madison based family owned senior services corporation. Together, they will develop the original hospital building into an array of senior residential and health care support services.
